## 2007 KENTUCKY ANNUAL HOME HEALTH SERVICES REPORT

### INTRODUCTION

The Division of Health Policy Development, within the Office of Health Policy, announces the release of the 2007 Kentucky Annual Home Health Services Report. This division, established on July 16, 2005, is responsible for utilization data collection and reporting required by 902 KAR 20:008 (rev. 10-15-03) and in support of the State Health Plan 902 KAR 17:041 (rev. 12-12-07). This report shows all census data, age distribution together with total patients served, and patients served by discipline and number of visits. This report is organized by county within Area Development Districts (ADD). A map of the ADDs is included at the end of this section.

This report covers the services provided from January 1, 2007 to December 31, 2007. The file received from the Office of Inspector General (OIG), Division of Licensure and Regulation contained 111 Home Health Agencies. Data in this report covers 100% of all licensed home health agencies.

Data in this report are organized in three sections. Section I shows beginning census, admissions, discharges and ending census by agency and county of service. Section II shows total patients served by age category, agency and county of service. Section III shows the number of patients served and number of visits for various disciplines (skilled nursing, home health aide, physical therapy, occupational therapy, and speech therapy) for each agency during 2007. The agencies are grouped first by ADD then by county served. **ADD totals** appear throughout the report following all county data for each ADD. **Statewide totals** appear at the end of each section. In addition, Section IV contains information and changes regarding individual agencies during the year.

The Division of Health Policy Development produces eight utilization and services reports, which can be obtained by contacting our office. In addition to the Annual Home Health Services Report, the following reports are available: Hospital Utilization and Services Report; Long-Term Care Services Report; Hospice Services Report; Magnetic Resonance Imaging Registry Report; the Ambulatory Surgical Services Report, the Megavoltage Equipment Services Report, and the Positron Emission Tomography Services Report. These reports can be downloaded from the following website: <http://chfs.ky.gov/ohp/dhppd/dataresgal.htm>

Questions or comments regarding the data contained in this report should be directed to Sheena Lewis at (502) 564-9592, ext. 3539 or e-mail: [sheena.lewis@ky.gov](mailto:sheena.lewis@ky.gov).

**This report now becomes the most recent official data on home health services utilization published by the Cabinet for**

## **Home Health Services Report Summary**

The following tables and graphs present statistics from the Kentucky Annual Home Health Services Report from 1998 to 2007.

The number of home health patients served in 2007 was 105,664. This number is well above the ten-year average (1998-2007) of 99,534 patients served. Changes in federal regulations beginning in 1997 changed reimbursement for agencies and forced agencies to alter business practices. Closures, mergers, and sales of agencies were more prevalent. Overall, the number of patients served has increased .5% from 105,175 in 1998 to 105,664 in 2007.

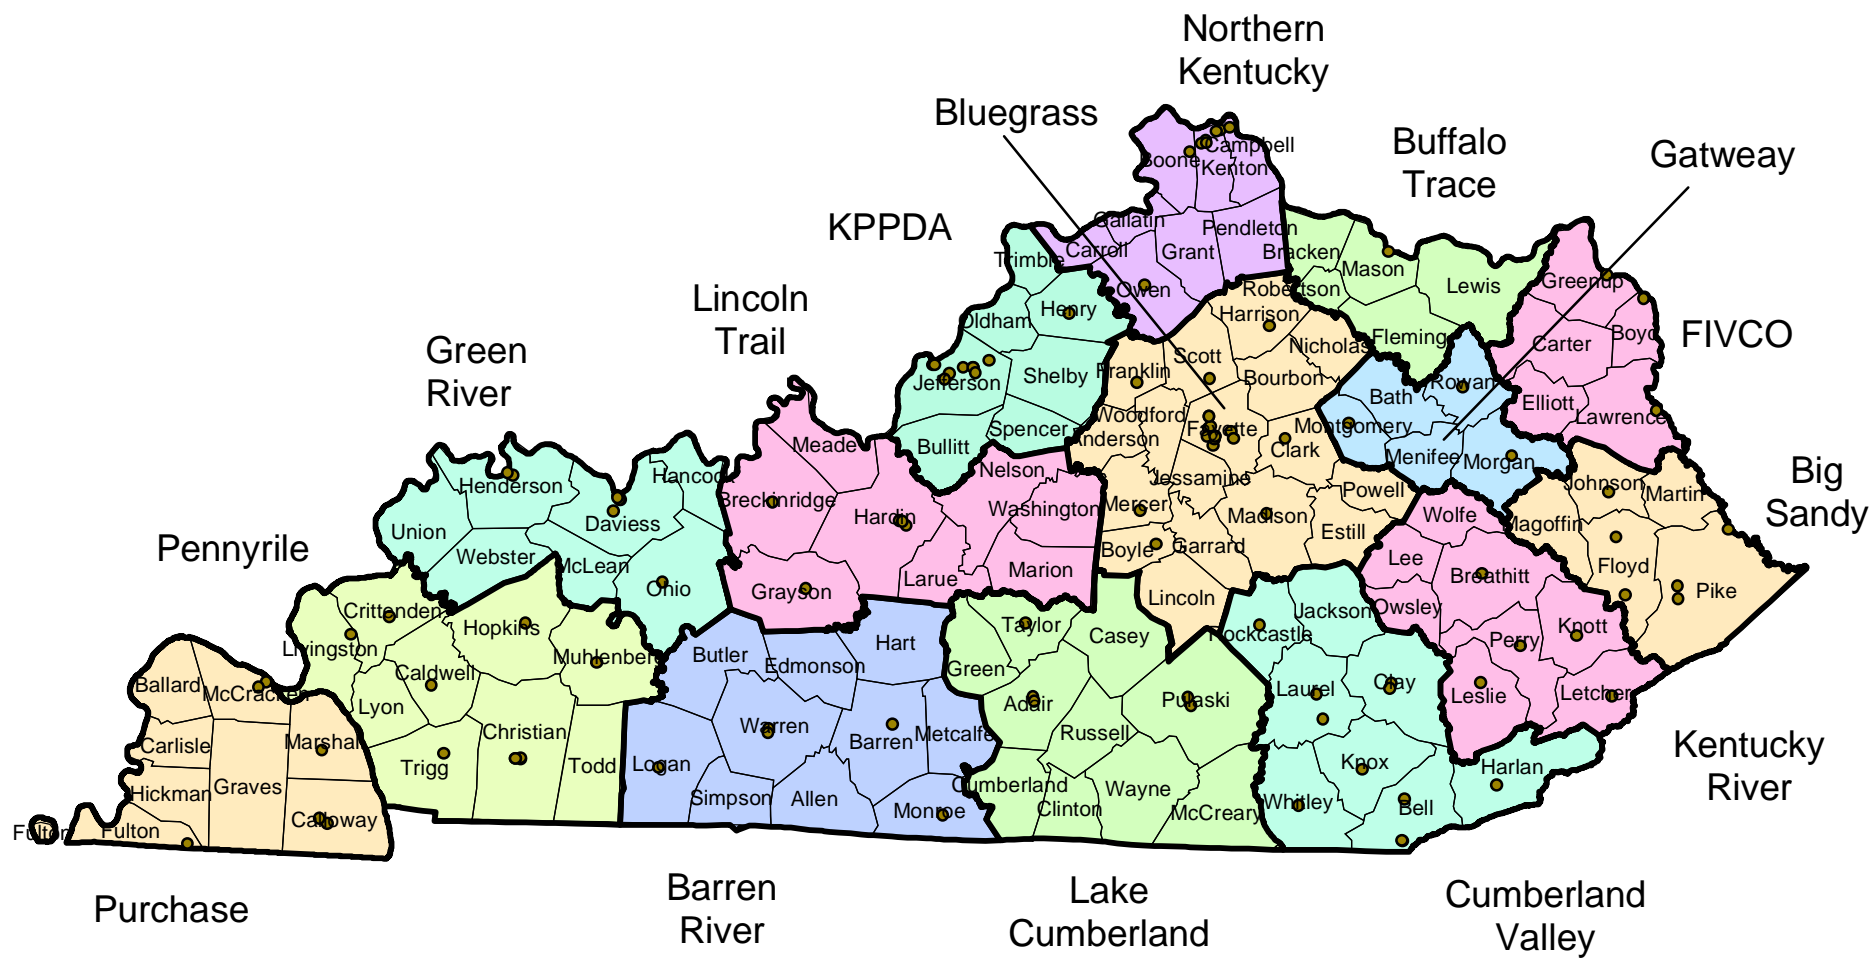

According to hospital discharge data for 2007, 54,586 patients were discharged from Kentucky hospitals to home health services. This number represents 9% of the 598,459 total patients discharged from Kentucky hospitals. Of the 54,586 patients discharged to home health agencies, 32,185 (59%) were females and 22,401 (41%) were males.

Individually, ten of the fifteen ADDs showed an increase in patients served from 2006 to 2007. Overall, patients served increased 3% from 2006 to 2007.

Data shows that the largest population of patients of home health services was from ages 75-84 consisting of 24% of the total patients in 2007. This trend has remained consistent from 1998 to 2007. Patients' age cohort 45-64 made up 23% of the patients served and 65-74 made up 20% of all patients served. Patients over 85 years of age made up 17% of the total number of patients served. These figures seem logical since it is expected that as people age; they will require more health services. However, there are less people in the over 85 age group in the total population and many of these may require higher levels of care than can be provided by home health agencies. Analysis of the age distribution among home health patients from 1998 to 2007 shows change over the past ten years.

Charts representing the data discussed in this summary are presented on the following pages.
